EXPERIENCE

Software Engineer

Salsa Technology 02/2023 Montevideo, Uruguay

Development and maintenance of Salsa's content aggregation APIs in the iGaming industry.

- Improved client onboarding efficiency by reducing API integration delivery times by 100% through the usage of A.I. agents.
- Maintained database version consistency across 3 environments by implementing Flyway for schema management.
- Developed and maintained Adobe Journey Optimizer integrations in Golang to serve emails to over 200,000 users.
- Delivered Tournament features engaging over 100,000 players, boosting player interaction across 30 casino platforms.
- **Tech Stack:** Java 1.7 & 17, Spring Boot, Spring Security, Spring Data, JSP, MySQL, Docker, Jenkins, Grafana

Java Developer

nexmuv - Inovação 03/2022 - 02/2023 São Paulo, Brazil

Migration of clients core legacy charging and billing systems to a microservices architecture, with the goal of increasing security, performance and scalability.

- Modernized legacy applications, increasing performance and reducing latency by over 30% through the adoption of Spring Boot microservices.
- Ensured reliable asynchronous communication across services by integrating **RabbitMQ**, improving message durability and decoupling workflows.
- Resolved high-impact production incidents through proactive log analysis and structured debugging, contributing to system uptime improvements.
- **Tech Stack:** Java 11, Spring Boot, Spring Security, Spring Data, OracleDB, Jenkins, Docker, AWS, Grafana, JUnit, Mockito, Rest Assured

Java Developer

PADO S.A. 04/2021 - 03/2022 Paraná, Brazil

Development of an MVP for an access control system, tasked with overseeing user interactions with digital locks and IoT devices.

- Achieved over **90% test coverage** across backend modules by implementing comprehensive unit and integration tests, improving system reliability.
- Successfully launched a production-ready MVP on time, aligning with stakeholder requirements and demonstrating platform viability.
- **Tech Stack:** Java 11, Spring Boot, Spring Security, Spring Data, Spring WebFlux, MongoDB, Docker, GCP, JUnit, Mockito

Fullstack Developer

V.P. Reis 03/2019 - 04/2021 Paraná, Brazil

Backoffice web system for American educational institutions, facilitating administrative work by bringing a modern web solution to manage financial and administrative students related work load.

- Developed and maintained backend and frontend components.
- Monitored production alerts and assisted in incident analysis.
- **Tech Stack:** Java 8, Spring Boot, Spring Security, Spring Data, Angular 7, TypeScript, MySQL, Docker

SUMMARY

Software Engineer with 6+ years of hands-on experience in implementing robust, safe, and high-performing applications.

My career has been focused on backend web development, and industries I've worked in include finance, iGaming, and education.

SKILLS

Java 7-17 • **Typescript** • **Golang** •

Spring Framework • **Angular** • **Spring Boot** •

Spring Data • **Spring Security** • **Hibernate** • **JPQL** •

JUnit • **Mockito** • **REST Assured** • **Cucumber** •

Docker • **Microservices** • **Kubernetes** • **CI/CD** • **AWS** •

EC2 • **S3** • **API Gateway** • **CloudFormation** •

CodePipeline • **Grafana** • **New Relic** • **PostgreSQL** •

Oracle DB • **Redis** • **DynamoDB** • **MySQL**

EDUCATION

Software Engineering

PUC Minas

03/2022 - 03/2023

Project Management MBA

Unicesumar

01/2021 - 01/2022

Civil Engineering

Unopar

01/2013 - 01/2018
